

Hallo,

I am pet from Germany and my Problem is:

After install MMEX ver 1.3.1 (DB v.7) on my Linux Mint 18.1 System  
the MMEX Options → Language change - is not working correctly.

Look to the Window below.

The Language files are correct in the folder /usr/local/share/mmx/po  
but not in the folder ~en !

I make the neu folder ~en by root an cp the file german.mo into the new  
folder.

Starting the program → I's ok yet.

Can you change the installation process ?

Thanks
